PROJECTS

- **My Portfolio Project** – Build my Practice portfolio website Project with a user-friendly interface this portfolio website introduces me as a passionate front-end developer from Karachi who crafts responsive and modern web interfaces. It highlights my skills in HTML5, CSS3, Bootstrap and JavaScript on a clean, mobile-first layout that focuses on usability. The website contains sections about myself, my skills, my projects, and my contact information, which are presented very clearly. Visitors can explore real projects like a website about a Travel Agency and my own portfolio. Overall, it reflects his dedication to clean UI design, professionalism, and continuous learning.
Technologies Used: HTML5, CSS3, JavaScript, GitHub Pages.

- **Aptech Project Website** – I build this E-project website as a semester end Project, "Toyo Toys," it is a modern, user-friendly showcase of toys, highlighting safe, educative, and fun products for children. It features a clean layout with smooth navigation between sections like Brands, Age Group, Compare, and Wishlist, making browsing simple and intuitive. The design focuses on trust, quality, and creativity, appealing to parents looking for reliable toys. Built with HTML5, CSS3, and JavaScript, the site is fully responsive and deployed through GitHub Pages for ease of access.
